

EcoDeck Premium Wood Deck & Railing System

Most of us enjoy the beauty and warmth of natural wood, but when it comes to our outdoor deck, wood is nothing more than a constant maintenance hassle. Long ago the Vikings learned to overcome this problem by treating the wood with fire, which in turn made it more resistant to the weather.

The modern version of this ancient process is called EcoPrem™. Today we use a combination of heat and steam to modify natural wood. This modification creates a decay, rot, insect and mold resistant wood. This patented process turns natural wood into a low maintenance, weather resistant product.

EcoVantage takes their EcoPrem Premium Wood material, shapes and cuts it into EcoDeck components. Creating one of the most exciting and beautiful deck systems in the market.

Key Features of EcoDeck

- Light Weight
- High Strength
- Sustainable Material
- Zero Toxicity
- Dimensionally Stable
- Outdoor Durability
- Long Term Warranty

EcoDeck Decking comes in a variety of styles and shapes.

STANDARD, MEDIUM & LARGE DECKING
EcoDeck standard decking comes in 1-1/4" thick x 5", 6-3/4", and 8-1/2" wide boards.

CROWN DECKING

EcoDeck crowned decking comes in 1-1/4" thick x 5" wide boards.

GROOVED DECKING

Standard and crowned deck boards come in the "new" grooved style which accommodates the EcoDeck Clip System.

RAILING COMPONENTS

A wide variety of railing components have been developed to provide the greatest amount of design flexibility possible. Many of the railing components have been designed to provide faster installation time.

FULL SYSTEM

By adding the StayTru™ structural products to your decking project you will not only get our warranty coverage on the deck and railing, but also for the structure of the deck. 30 Year Material Warranty for everything from the ground up!

30 Year
Limited Material
Warranty is
available for all
