

# StayTru™ Premium Structural Wood material

Most of us enjoy the beauty and warmth of natural wood until we put it outdoors, then it begins to warp, twist, cup, split and rot. Long ago the Vikings learned to overcome this problem by treating the wood with fire, which in turn made it more resistant to the elements.

The modern version of this ancient process is called EcoPrem™. Today we use a combination of heat and steam to modify natural wood. This modification creates a decay, rot, insect and mold resistant wood. This patented process turns natural wood into a low maintenance, weather resistant product that resists warping, cupping, and twisting once exposed to the elements.

**Because EcoPrem wood does not use any chemicals, StayTru then is a non-corrosive product. The only corrosion that can occur is strictly Mother Nature!**

Using the EcoPrem process, EcoVantage takes #1 grade Southern Yellow Pine and converts it to the StayTru product. The EcoPrem process enhances the already structurally superior wood. The enhanced properties make StayTru the preferred structural wood material for outdoor use.

## Key Features of StayTru

- Light Weight
- High Strength
- Sustainable Material
- Zero Toxicity
- Dimensionally Stable
- Outdoor Durability
- Long Term Warranty

StayTru comes in a variety of shapes and sizes

  
2 x 6 x 8', 10', 12', 14', 16'

  
2 x 8 x 8', 10', 12', 14', 16'

  
2 x 10 x 8', 10', 12', 14', 16'

  
2 x 12 x 8', 10', 12', 14', 16'

  
4 x 4 x 8', 10'

**30 Year  
Limited Material  
Warranty is  
available for all  
StayTru™  
products**

**Created from sustainably sourced wood!  
Because it is so stable it is exceptionally easy to maintain,  
saving both environmental and financial costs!**

**Call today and learn how you can benefit  
from using StayTru on your next project!**
